# Lab 2

## Send Arduino Yún data to Google Spreadsheet

Mary Loftus

# What will you make?

## Lab 2

1. Connect Yun to USB & Wireless
2. Create & connect to a Google Spreadsheet to record sensor data
3. Upload your code and link to the working Spreadsheet to your GitHub page
4. Upload Arduino code for the lab and a Word doc or text file - noting any issues you encountered

Is a platform of software and APIs designed  
for working with the IoT - 'put the cloud  
inside your hardware'

[temboo.com/about](http://temboo.com/about)

API - Application Program Interface

IoT - Internet of Things

Instructions are in File > Examples >  
Temboo > Arduino Yun >  
SendDataToGoogleSpreadsheet

or
